ramdom music player

This player fisrt makes a random array of numbers using a srand function and rand function paying heed to the PIEGON hole principle ; thus giving equal probability to all songs. this output is then —- given to the system with the mpg123 command which plays the required file . Press q to exit mpg123 in one song and play next song in programm,s array. Holding q goes through all and hence at ends exits. Thank you.
